

EVENT CHEAT SHEET

STEP 1: CHOOSE YOUR EVENT SHAPE

	A: SCHOOL VS. SCHOOL	B: CLASS TEAMS	C: ONE SCHOOL, ONE TEAM
Who's coming	several schools	one classroom	one school
A "team" is	each school	each small group	the whole school
A "player" is	an individual student (use their name), or group of students (use the group/team name or a representative's name)		
How many teams	2-10+	2-8	1
Approve for event?	yes, each school	yes, each group	yes
Approve statewide?	yes, each school	no	yes
After event	nothing	merge groups into school	nothing

STEP 2: LET ASHLEY KNOW

Before you prep anything, tell Ashley the event is coming so she can register & schedule it ahead of time: event name, date & time, school(s), and event shape. You can also set the event up and [optional] pre-create teams yourself in Admin.

STEP 3: PREP THE DEVICE

- 1 Install the app.** Open the site in Edge or Chrome, click Install in the address bar. Use the shortcut after this, not a browser tab. Only do this once per device, NOT per event.
- 2 Cache for offline.** Admin → Offline readiness → Cache for offline. Wait for "✓ All assets cached". Redo after every app update. **IMPORTANT:** if the browser offers to save the admin password, click Never - a saved password lets a student click straight into Admin.
- 3 [Optional] Pre-create the schools/teams.** Admin → Events → Manage Teams. Now students just pick it from a dropdown.
- 4 Warm the leaderboard.** Tap the trophy once while online. Seeing real teams and any existing scores proves the cache filled.

STEP 4: RUN THE EVENT

- 1 Confirm the event is open.** Every prepped device joins the open event automatically, so opening Advanced Mode should show "How do you want to play?" naming your event (or "Which event?" listing multiple open). A scheduled event opens itself at its start time; to open one early: Admin → Events → Open now.
- 2 Advanced Mode → students pick Team Play (competitive) or Casual Play (general event, nothing tracked).** Then enter teams on the roster screen (if not pre-made), and pick a game.
- 3 Up to 4 players per device, per game.** Players on one device can be on different teams. A "player" can be a whole group - they pick their team, put the group or representative's name in the name field, and play. Go over the game rules via the (?) buttons before playing.

STEP 5: BACK HOME (ONLINE)

(feel free to leave steps 2-4 for Ashley)

- 1 Open the app on Wi-Fi and leave it open 1-2 minutes so queued scores can flush to the cloud.**
- 2 Merge duplicate schools:** Admin → All teams → Rename one to exactly match the other.
- 3 If not done already, Approve teams statewide so their points reach the All-Time board.**
- 4 End the event (Events → End).** Never Delete; that destroys every score tagged to it

WI-FI AT THE VENUE / SCHOOL

SITUATION	DO THIS
Good, open Wi-Fi	Play via installed app shortcut (recommended) or browser. Everything syncs live.
No Wi-Fi at all	Must play via installed app shortcut. Caveat: Admin approvals and Leaderboard do NOT sync across multiple devices.
Site is blocked	Disconnect from the Wi-Fi entirely and play via installed app shortcut (or try a phone hotspot for live sync).

WHILE OFFLINE, DO NOT:

- ✗ Clear browsing data or site data
- ✗ Uninstall the app before syncing
- ✗ Open the site in a second tab while the app is running

TROUBLESHOOTING

SYMPTOM	FIX
No team/casual prompt	No event is open → Admin → Events → Open now
“Which event are you at?” keeps asking	Two events open at once → Events → End the stale one
Team dropdown is empty	Nothing approved for the event yet → Approve for event
Team not on leaderboard	Team still pending → approve it
Field Guide photos missing	Admin → Cache for offline, while online
Two rows, same school	All teams → Rename one to match the other exactly

QUICK REFERENCE

Contact	ashley@sdsol.org · 605-251-4364 (text)
Live site	https://plantshley.github.io/SDSHC-games-hub/
Admin panel	https://plantshley.github.io/SDSHC-games-hub/#advanced/admin
Admin password	Ask Ashley – one shared password. Not kept between sessions (signs out when you leave Admin)
Active event	Auto-joined. Every prepped device joins the one open event; if several are open it asks which
Teams & Events	Shared in the cloud. Schedule events and pre-create teams from any device once, online
Team names	Global, matched by name. Inappropriate language rejected.
Rename onto existing name	Merges the two teams
Delete team/event	Destroys its scores. Use End, not Delete
Players/groups per game	1-4
Scheduled events	Open themselves at their start time (device clock). “Open now” opens one early
Open events	Auto-end 24h after they start. Push the “Ends” time out for longer; “End” closes early
Idle reset	Advanced: 10 min → opening screen; Kid Mode: 2 min → opening screen; Admin panel: disabled
Minimum screen width	~600px (Field Guide: ~900px). Rotate to landscape on mobile.
